5. What does a Http 302 response code indicate?
6. Explain the disadvantages of CGI scripting.
7. List 3 features of HTML that may be browser dependent - test them in Firefox,Chrome, Comet.
8. Given this schema, find the error with the XML element following it :

```
<xs:complexType name="StudentType">
  <xs:sequence>
    <xs:element name="name" type="xs:string"/>
    <xs:element name="age" type="ageType"/>
    <xs:element name="email" type="xs:string"/>
  </xs:sequence>
</xs:complexType>
```

```
<student>
  <name>"345612"</name>
  <age>Twenty-two</age>
  <email>alice@gmail.com</email>
</student>
```

9. Give a DTD for the XML element student in Question 8. Will the XML error be validated with the DTD?

10. For the following XML, provide a XSD with the following restrictions:

```
<book>
  <isbn>9780134685991</isbn>
  <title>Database Systems</title>
  <price>450.50</price>
</book>
```

Write an XSD with : isbn exactly 13 digits ; the value of price must be greater than 0
